

# Integrated System of Equipment Works Seamlessly Together

**FHE Pressure Control Equipment**  
Trailers are costumed-designed to transport, store, and protect your 5K, 10K, and/or 15K equipment.

FHE Equipment Packages conveniently combine all your pressure control equipment you need for your wireline operations. Each package is custom-designed based on your specific requirements and type of work being performed.

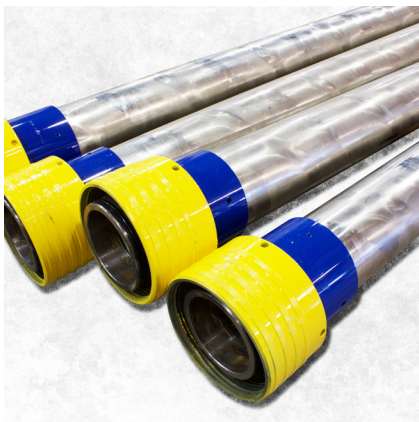

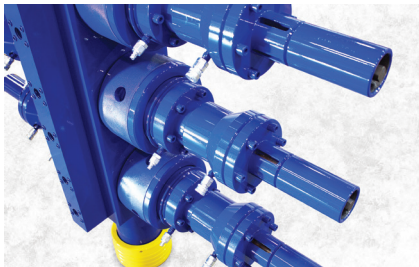

The equipment trailers are built to safely transport all your gear. Their design allows you to easily and safely unload and load your equipment to help you avoid injury or damage to your equipment.

## **FHE Equipment Package Features:**

- Designed to work seamlessly together.
- Trailers keep equipment secure during transportation.
- Custom layout to match job specifications.
- Include safety rails and steps.
- Reduces risk of injury and damage to equipment.

Our Dedicated Team is
